

# What does it take to have **“World On Wheels”** in your town?

The point of World on Wheels is to get the word out that ordinary people can end the climate crisis, if enough of us realize we can do that and start taking the right actions – actions we can all take!

- 1 YOU say “We’re going to have World On Wheels here!”**
- 2 Design your skating, biking, or “anything with wheels” event!** You can host competitions, races, lessons, it’s up to you!
- 3 Pick your local climate activity!** Beach clean-ups, tree planting, start a community garden, create a community compost bin, etc. You can create your own action or you can partner with a local climate action group.

## GET THE WORD OUT!

Use social media to spread awareness on your event, Tag us, and we will help promote it!

**Whatever you come up with, these are outcomes for World On Wheels:**

- Everybody has an experience that they’re making a real difference in the world and that they’re a key player in their community by getting the opportunity to participate in a local direct-action climate activity
- Lots of people download the 2030 or Bust app, take the World On Wheels Pledge and start taking climate-busting actions
- Your event gets lots of attention – Skaters changing the world!
- Everybody has a blast!

## THE **WORLD ON WHEELS** PLEDGE

- THE FUTURE IS MINE
- I AM ENDING THE CLIMATE CRISIS
- MY ACTIONS HAVE A GLOBAL IMPACT
- SKATERS FOR HUMANITY
